

Software Engineering Internship

Be the engineer behind the solution that connects 60% of Earth's population.

With a communications platform that reaches **7+ billion** transactions monthly and **4+ billion** devices worldwide, we ensure you can connect with your favorite brands through your preferred channels.

Today, Infobip's communications platform is used by over **60% of the world's population**, making it the largest global network of its kind. With 60+ offices in 6 continents and over 1,400 experts, we aim to become the region's **engineering powerhouse**.

If you are a graduate or undergraduate in the **IT field** that is looking for hands-on experience, we have a place for you at Infobip!

Dev Campus Description

At our Dev Campus **you'll learn about:**

- Java, Spring, Javascript and React
- well designed, testable and scalable code in accordance to clean code principles and team agreement
- technologies you need to put your code to action such as Git, Maven and Jenkins
- the importance of testing
- agile development and Scrum methodology

As a **Software Engineer**, you will directly impact the quality of our products and service, dealing with challenges of complex architecture (scalability, fail over, balancing...) of a 4-nine uptime system that drives huge traffic.

More about you:

You're a

- B.sc. or Mr.sc. of a college related to software engineering (eg. computer science, mathematics) with no professional experience

Or

- have knowledge and experience in software engineering regardless of formal education and consider yourself a junior software engineer

And you're

- genuinely curious about how things work and enjoy a challenge of figuring out why something works the way it does
- driven by problem solving
- fluent in Croatian and English and have an active work permit for Croatia or BiH
- able to **work full time**
- eligible for permanent work in Vodnjan, Rijeka, Sarajevo or Zagreb

Start your career with:

- an experienced mentor
- structured lectures by experts
- quality team work
- friendly and helpful coworkers

Why other students choose us and stay?

- Professional development – Challenging tasks and great career development opportunities.
- Great environment – Team spirit, passion, creativity and persistence are the drivers of our company.
- Awesome clients – We serve and partner with the majority of the leading IT companies, mobile operators, OTTs, brands, banks, social networks, and many more.
- Compensation & benefits – Competitive salary, covered travel expenses, discount at the local gym, team buildings, free group sports sessions, flexible working hours, coffee, healthy snacks and beverages in the office.
- Company apartments and cars at your disposal for business trips and long term assignments.
- All the IT Equipment for your needs! We have a special team taking care about your equipment needs
- Summer Connect Conference – internal conference which is gathering Infobippers all over the globe
- Team Buildings for each team, department and office
