## We are looking for Junior Visual Designer (m/f)!

### About AGENCY04:

We are fast growing company based in Zagreb. We create great software products for our clients around the world. These products are usually complex systems based on Java, GoLang, React, Angular, Groovy and native Mobile tech. Outside of client work, we are always looking for new startup ideas or technologies to try out and have fun with. In general, we are geeks in the world of serious software development.

### Key responsibilities:

- Plan, design and execute concepts for promotions and campaigns to be used throughout social media, website and offline channels
- Design Web interfaces
- Design and develop graphics and illustrations for Web and marketing materials
- Brainstorm concepts for campaigns
- Collaborate with other Creatives
- Creation and execution of all materials including print advertising and marketing materials
- Creating mockups

## Specific knowledge and skills:

- Experience with designing and developing graphics for print and Web, and understanding the importance of typography
- Experience with Adobe Illustrator, Photoshop, Indesign, XD
- Ability to conceptualise original ideas and accept and implement feedback
- Ability to pay strict attention to details
- Fluent in English

## Additional skills

- Experience with HTML and CSS
- Experience with Sketch, Invision
- Knowledge of print production

Location: Zagreb
