Nastavnički pogled

Konkretni primjer 1 – *custom* specijalistička edukacija

Let's say that we need to create a curriculum for a custom IT course about forensics on Linux. How would you structure that curriculum in terms of lectures and practice work? Say we have 60 hours to divide between the two.

Konkretni primjer 2 – *custom* specijalistička vendor-based edukacija (a la program obrazovanja)

Let's say that we need to create a custom course based on old MCSA and MCSE certifications. It can be up to 150 hours long and needs to cover all Windows Server-related topics from those certifications. Please make sure that you mention lecture and lab names for further development.

Konkretni primjer 3 – *custom* mikrovalifikacija

Are you aware of EU's microqualification programs?

Exactly. Let's say that we need to develop a microqualification for Microsoft Azure Cloud security, that would be based on AZ-500 course. It can be up to 150 hours long, and needs to cover some basics of Azure and then be heavily rooted in AZ-500 and Azure security. How would you structure that microqualification course between lectures and lab work? make sure that you mention lecture and lab names for further development.

Studentski/polaznički pogled

Konkretni primjer 1 – ispitno pitanje na temu Ansible DevOps playbooka

Let's say that we need to create an Ansible playbook that needs to connect to the remote server via ssh by using account called devops, sudo to it, and configure network adapter ens192 to be set to IP address 10.10.10.1 with 255.255.255.0 as a netmask, and add entry to firewalld firewall that allows SSH and SSL access to SSH and Apache web service. Remote distribution is based on CentOS 9. What would that playbook look like?

Konkretni primjer 2 – ispitno pitanje na temu **BASH** shell scriptinga

Let's say that we need to create a curriculum for a custom IT course about forensics on Linux. How would you structure that curriculum in terms of lectures and practice work? Say we have 60 hours to divide between the two.

Konkretni primjer 3 – *custom* specijalistička edukacija
